DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, drawn to document processing, classified in class 707, subclasses 1-10.
- II. Claims 10-19, drawn to scanning a document, classified in class 358, subclass 403.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because it relates to document processing profile with no need for scanning and printing. However, the subcombination has separate utility such as scanning and printing of a document.

A telephone call was made to Karen Dana Oster (Reg. No. 37,621) on March 16, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
